

Dismissal of Cuban Minister of Interior due to failure to
circumvent drug trafficking involvement

This is Lionel Martin in Havana..Only two days after a military honor court recommend the death penalty for a top army General involved in drug trafficking, the Cuban government has announced the dismissal of its Minister of Interior. Here is the story

PB-10

The Minister of Interior here in Cuba is the chief of the police and state security apparatus. His Ministry had a special top secret department that tried to circumvent the U.S. trade embargo against Cuba by acquiring U.S. made products. Over past days it has been revealed that the head of that department, Colonel Tony de la Guardia was involved in the dealings with the international drug traffickers. The Colonel reported directly to the Minister. The fact that the Minister did not stop the drug operations is the main reason for his dismissal
