

Cuba Retaliates on US Plan to Broadcast
Propaganda TV Station

RB-4

bs

This is Lionel Martin in Havana - Cuba flexed its electronic muscles by transmitting a speech of Cuban president Fidel Castro that interfered with six regular band radio frequencies of the United States. Here is the story..

The interference with U.S. commercial radio stations was in fact a message to Washington. The U.S. has announced that it is about to begin broadcasts of a propaganda station beamed directly to Cuba. The Cubans are angry about it and say that the U.S. will be violating international by interfering with their television channels. So the Cuban interference with U.S. radio broadcasts were aimed at showing that Cuba has the capability of hitting back electronically.
