This is Lionel martin in havana for ~~friday~~ thursday evening or friday morning use. the service message. President Carters suggestion that Cuban refugees be screened by U-S. officials in Havana before being allowed into the united states has fallen on deaf ears in Cuba. Here is the story:

The Cuban government position is that as far as it is concerned,, the dunkirk style evacuation of refugees from cuba in small boats from florida, can continue indefintely.

An article in cubas official newspaper, said by many to be written by fidel castro himself, says that the sea route in small boats has proven efficient and safe.

The article says that the problem of stopping illegal entry into the united states is up to President Carter and ~~there~~ that Cuba will conintue to welcome the boats from florida.

The article notes somewhat ironically that in the past any refugees fleeing from cuba were welcomed as heros in the united states. Now it says, ~~from~~ the united states wants to stop some of the refugees from entering.

It admitts that Cuba has sent thieives, ~~and~~ prostitutes and gamblers to U.S. shores because it says, they pine for quote the yankee paridise" but it denies sending mentally ill people because it says, it ~~would~~ it just would send them to quote that dehumanized society unquote.

this is lionle martin in havana for CBC radio news.
